

LOW-CODE / NO-CODE FEST

Organized by:	SOEC
Date of Activity:	21–23 Apr 2025
Duration:	3 Days
Venue:	Seminar Hall, First floor, & Computer Lab, Main Building
Participants:	Open to All
Resource	None
Persons/Experts/Guests	

Aligned SDGs

Rationale for SDG Linkage

Providing practical, skill-based learning. Making technology education accessible to all students, even without prior coding knowledge in a digital world

Encouraging technological innovation through app and solution development; Promoting and Supporting the use of modern digital tools for efficient system building; technology-driven solutions for real-world problems.

Objectives of the Activity

To encourage innovation and creativity without the need for advanced programming skills. Also promote digital skills and problem-solving abilities to students for future-ready technologies and careers. To demonstrate how technology can be used to develop solutions quickly and efficiently

Description of the Activity

The Low-Code / No-Code Fest were organized to familiarize students with modern application development platforms that allow users to create websites, apps, and digital solutions with minimal or no coding.

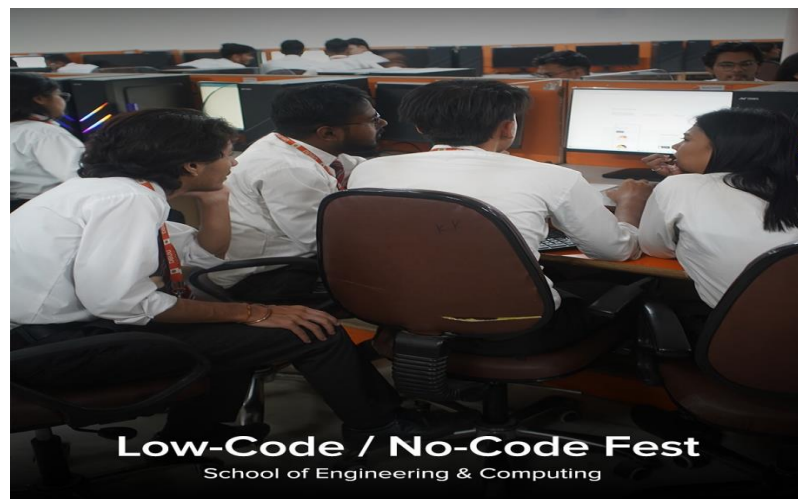

Outcomes of the Activity

Enhanced digital literacy and technical confidence; improved problem-solving and logical thinking skills. Also encouraged innovation and entrepreneurship mindset to reduced fear of technology and coding.
