Participants:	60 participants including students and faculty members.
Resource	Local Potter / Artisan / Craft Trainer
Persons/Experts/Guests	

Aligned SDGs

Rationale for SDG Linkage

The workshop provided experiential and hands-on learning, enhancing creativity, practical skills, and lifelong learning opportunities beyond traditional classroom education.

Pottery as a traditional craft promotes skill-based employment, self-reliance, entrepreneurship, and sustainable livelihood opportunities

Objectives of the Activity

- To develop creative and artistic skills among students.
- To provide hands-on training in pottery and clay modeling.
- To promote appreciation of traditional crafts and artisans.
- To encourage skill-based learning and entrepreneurship.
- To support sustainable economic activities aligned with SDG 8.

Description of the Activity

The Pottery Workshop was organized as a creative skill development initiative aimed at providing practical exposure to traditional pottery techniques. The session began with an introduction to the history and significance of pottery as a cultural craft. The resource person

demonstrated basic techniques such as clay preparation, wheel throwing, shaping, and finishing.

Participants actively engaged in hands-on practice, creating simple pottery items under expert guidance. The workshop emphasized patience, creativity, and precision while highlighting the economic potential of pottery as a sustainable livelihood option. The interactive nature of the session made it both educational and engaging.

Outcomes of the Activity

- Enhanced creative thinking and manual skills among participants.
- Practical understanding of traditional craft techniques.
- Increased awareness about skill-based employment and entrepreneurship.
- Positive student feedback and high participation levels.
